EXPERIENCE

Web Developer - ChrisHillStudios

July 2018 - Present
Victoria, Australia.

- Collaborated with teams of developers and product designer to design and build responsive full stack web applications using agile best practices
- Created a subscription wordpress website for www.vosa.org using PHP and jquery to add customization which in turn increased their membership by 70%.
- Use Monday.com to manage workflow with product designers, graphic designers, and other colleagues to review wireframes needed to develop and deploy their content – and ensure there is a clear establishment of what can be created within what timeframe.
- Implemented contingency plans to mitigate website downtime which reduce cron-job failure and emergency website crash by 40%.
- Maintained and expand/enhanced website function once built following best SEO practice.

Software Developer - VetCareID

April 2021 - November 2021
Indiana, USA

- Created a full stack application using PHP, JavaScript, HTML and CSS that help pet owners manage their pet health records effectively with all medical records from different vet visits in one place.
- The web app is packed with feature that allow pet owner the luxury of viewing their pet medical record on the go
- The app reduces delays in case of emergencies since all previous medical files can be easily accessible.
- It also provides a unique email assigned to a pet so that the vet can send each medical record upon each vet visit.

Fibre Optics Route Surveyor - HUAWEI (IT SUPPORT)

December, 2019 - March, 2020
Lagos, Nigeria.

- Fibre to the site survey
- Proposing possible route for fibre connection within cities in Nigeria using a dedicated software.
- mapping of locations where there is no fibre presence and testing the soil for new routes so as to increase 4G network connectivity to those areas.
